ACADEMY OF DENTISTRY TORONTO

OUR ACADEMY

The ACADEMY OF DENTISTRY, formerly the Toronto Dental Society, has been functioning continuously since 1889. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

The OBJECTS of the Academy are:

1. Advancement of the art and science of dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good fellowship among its Fellows, and among the members of the dental profession generally.

Some of the specific services provided are as follows:

1. The Annual WINTER CLINIC.
2. After hours EMERGENCY TREATMENT service for the public.
3. The Annual INFORMATION BOOK, a directory of dental organizations.
4. The LADIES' AUXILIARY, which provides support for worthy dental projects, and various fellowship activities.
5. PUBLIC RELATIONS, a secretary to answer the public's queries and complaints.
6. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
7. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
8. DENTAL MEETINGS with excellent programs and clinicians.
9. Assistance in formation of new STUDY GROUPS.
10. HONOURARY MEMBERSHIP to recognize outstanding dentists.
11. ARCHIVES for historical dental information.
12. Fellowship activities such as the Annual GOLF TOURNAMENT and CURLING BONSPIEL.
13. MEDIATION services for the public.
14. COMMUNICATION with dental auxiliary organizations.
15. LIAISON with local government and other community groups.
16. Provides an ASSOCIATE PLACEMENT service.

THIS IS OUR ACADEMY.
KEEP IT STRONG.
SUPPORT IT, ENJOY IT.

Mr. Stewart Cannon

The L.D. Caulk Co. of Canada 635-7662

PRESIDENT'S MESSAGE

ALDO BOCCIA, D.D.S.

It is indeed my pleasure to extend a warm welcome to all attending our Fifty-Second Winter Clinic of the Academy of Dentistry.

Winter Clinic has become the most successful one-day meeting in North America for many reasons. The first reason is Organization. Under the leadership of Dr. Wayne Pulver, this year's Winter Clinic Chairman, we are again offering a

varied program to the entire dental team. The committee has recruited renown speakers in almost every discipline of dentistry and related special interests. It is a prodigious task each year to put together such a successful program, and I want to thank Dr. Pulver and his committee, and our coordinating executive staff, Mrs. Raisyl Wagman and Mrs. Nancy Self for all their efforts.

Another reason that has spelled success for the Winter Clinic is the fact that the Academy has kept the dental team together under one roof, in a learning experience where the team can take their joint experiences back to their own offices in a more successful and rewarding manner.

The dental industry must also be commended for their continued and increasing support to the Winter Clinic and the Dental Team as a whole.

Of course, the most important reason for our success is **you**. Without you all our efforts would have been in vain. You make all the principles on which this meeting was founded — quality programs with fellowship and hospitality, work so well.

Thank you for being with us. I look forward to seeing all of you next year as well, when your Academy celebrates its 100th Anniversary 1890-1990. Look for future announcements.

Have an enjoyable and rewarding day!

**PRE-REGISTERED DENTISTS —
YOUR BADGE IS YOUR RECEIPT!**

CHAIRMAN'S WELCOME

WAYNE PULVER, D.D.S.

On behalf of the Academy of Dentistry, I extend a warm welcome to everyone attending this our 52nd Annual Winter Clinic Meeting.

We are proud that Winter Clinic has become the premier one-day meeting in North America. This has been accomplished by hard work by our committee members and staff. The principles of the

meeting have remained consistent over the years with quality scientific presentations coupled with fellowship and hospitality.

This year's clinical program should be one of our best ever. From the world of lasers to the art and science of ceramics and all in between, there definitely will be something for you and your staff to enhance your clinical and scientific knowledge.

In addition to the varied distinguished clinicians we also will have table clinic presentations and of course, commercial exhibits.

Remember to mark off Thursday, November 30, 1989 in your appointment books.

Please bring your staff and enjoy the terrific day which has been planned for you.

We look forward to being your hosts for the Winter Clinic.

O.D.N. & A.A. WELCOME MERNIE WALLACE, C.D.A. PRESIDENT

On behalf of the Executive Committee and Staff of the Ontario Dental Nurses and Assistants Association it is my pleasure to invite you to **our** 52th Annual Winter Clinic.

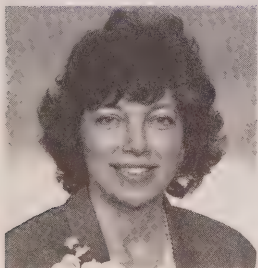

The Total team concept of dental health care professionals is essential for the advancement of our careers.

Winter Clinic is a time to enjoy a vast range of scientific programs, continuing education courses, commercial exhibits and fellowship. This year the O.D.N. & A.A. Winter clinic is once again under the leadership of Nancy Block, C.D.A. and **our** entire Management Team.

This day is designed for dentists, dental assistants, receptionists and hygienists.

Our Executive Committee look forward to seeing you there!

WELCOME FROM THE O.D.H.A. ROSEMARIE CRAVEN, R.D.H. PRESIDENT

"Fellow Professionals"

Winter Clinic offers the professionals in Ontario's oral health care delivery team a wonderful opportunity for broadening their scope of knowledge.

Continuing education is **essential** to our growth — personal and professional — so that we can continue to meet the increasing preventive and therapeutic dental needs of Ontario's people.

On behalf of The Ontario Dental Hygienists' Association, it is my pleasure to welcome all those partaking of this year's excellent program. Furthermore, I hereby offer thanks and continued support to the Academy of Dentistry and all those individuals involved in the planning and delivery of this 52nd Annual Winter Clinic.

The Future is

PHOT-X

2001CP

Intraoral Dental X-ray

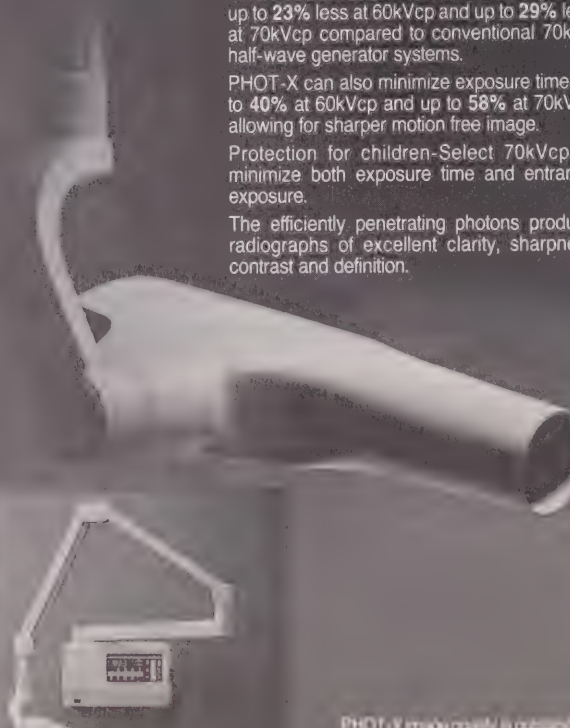

PHOT-X can provide "more efficient rays" and minimize the harmful "soft ray" exposure dose.

PHOT-X can reduce the initial skin exposure up to **23%** less at 60kVcp and up to **29%** less at 70kVcp compared to conventional 70kVp half-wave generator systems.

PHOT-X can also minimize exposure time up to **40%** at 60kVcp and up to **58%** at 70kVcp allowing for sharper motion free image.

Protection for children-Select 70kVcp to minimize both exposure time and entrance exposure.

The efficiently penetrating photons produce radiographs of excellent clarity, sharpness contrast and definition.

PHOT-X image quality is outstanding as a result of Constant Potential Technology, small focal spot, and Belmont functional design.

Belmont, a leading X-Ray manufacturer.

PHOT-X is the result of a dedicated research and development program at Belmont, and an on going factory testing program supported by Belmont Field Service and technical representatives.

For more information on the PHOT-X, contact your nearest Belmont Equipment Dealer or call Takara Company Canada Ltd., 2076 S. Sheridan Way, Mississauga, Ont., L5J 2M4.

LUNCHEON SPEAKER

DICK BEDDOES

Beddoes is a media maverick, who was foaled in the exotic Alberta boondock of Sheep Tracks. He was the yappiest lance-corporal in the Canadian Army, when at 17, he helped win the battles of Currie Barracks and Debert, N.S., circa 1945.

Dick attended the University of Alberta, from where he was kicked out in 1952. It is just a canard, that stuff about the entire U. of A. faculty going out and getting gloriously drunk

when Beddoes left one step ahead of the Dean's shoe. It is a canard, because U. of A. professors were so poorly paid that they would have been unable to buy enough alcohol to give a flea a backrub.

It is a fact though, that the Edmonton Bulletin folded 6 months after Beddoes joined it as a cub reporter. He later served 10,000 purgatorial years in the newsroom of the Vancouver Sun, before being transferred to the sports department — at the loud demand of a city editor he managed to frustrate.

Beddoes served 10 years in Sun sports, until rescued from Vancouver in 1964 by the Globe and Mail. He worked for Canada's national blot as a columnist until 1980, when he departed to CHCH-TV in Hamilton as sports director.

Fired by CHCH in January, 1988, because he was considered too expensive — Dick now does pre-game hockey interviews for the Maple Leaf broadcasts; a 30-minute interview sports show for CHCH-TV once a week, and otherwise live off the untiring avails of a working lady.

He has written three books, without once being sued, and is currently working on a biography of Harold Ballard, another rogue. A National Newspaper Award for sports writing and the Bill Corum prize for excellence in horse-writing in North America have been won by Beddoes, as well as two Can-Pro awards for excellence in sports programming among private Canadian TV networks.

Dick Beddoes doesn't want to be a millionaire, he simply wants to continue as a sports writer, and live like one. He considers himself widely underpaid, but wonderfully overprivileged — and he has never met a microphone he didn't like to talk into.

COMMUNICATING FINANCIALLY WITH YOUR PATIENTS

JENNIFER M. DE ST. GEORGES

Synopsis

The basis for economic control in the dental office is a well ordered network of communications between the doctor, the staff and the patients.

INFORM BEFORE YOU PERFORM!

This seminar focuses on how to PREVENT collection problems by describing the professional caring manner and approach that will motivate your patients to agree to needed therapy and assume the necessary financial commitment. Topics to be covered are:

- "Money talk" on the telephone with new patients.
- How to handle "shoppers".
- Discussing money at the chair.
- Collecting at the front desk.
- Financial arrangements and options.
- The best staff member for arranging and collecting.
- How to handle "No-Shows".
- Telephone collecting.

Biography

Jennifer M. de St. Georges, Monte Sereno CA, is a member of the National Speakers Association and has lectured world wide including the CDA, Journees Dentaire and last year for the AGD in Toronto.

PAIN CONTROL IN DENTISTRY TODAY AND TOMORROW

STANLEY F. MALAMED, D.D.S.

Synopsis

Pain! It challenges us because it is THE factor driving patients to the dental office. We now know that pain is a problem in its own right and acute pain is often intolerable. How can we intercept it? ELECTRONIC DENTAL ANESTHESIA (EDA) has recently been reintroduced, with great improvement, for the treatment of periodontal

procedures, restorative dentistry, TMJ treatment and other areas. Are these TENS unit modifications such as: Comfortron or H-WAVE machine truly effective? And what of PHONOPHORESIS? However, in spite of all the new non-invasive technology, what of the recent advances in LOCAL ANESTHESIA drugs such as the long acting agents edidocaine and bupivacaine?

Dr. Malamed intends to outline the present and the future of PAIN CONTROL in dentistry in this lecture of **two parts**. Beginning with a review of EDA he will continue with an analysis of the aforementioned local anesthetics plus the alternative administration techniques: Gow-Gates, Akinosi and PDL. He will conclude with more recent advances that are helping to control PAIN IN DENTISTRY.

Biography

Dr. Malamed graduated from the New York University of Dentistry in 1969 and certified in anesthesiology at the Montefiore Medical Centre in 1971. Presently he is Professor of Anesthesia and Medicine at the University of Southern California School of Dentistry, Los Angeles. Dr. Malamed has published 3 textbooks and over 60 scientific papers.

PLACE:	Room 206D
TIME:	9:00 — 11:30 a.m. 2:15 — 4:30 p.m.
CHAIRMEN:	Dr. Peter Haslam Dr. Brian Jaffine

The Academy of Dentistry acknowledges and thanks Hoechst Canada Inc. for their assistance in the sponsorship of Dr. Malamed's lecture.

SPEAKING PATIENT LANGUAGE — COSMETIC DENTISTRY

JACQUELINE DZIERZAK, D.M.D.

GO FROM HIGH TECH TO HIGH TOUCH (Morning Session)

Synopsis

What did he say? Why is it often necessary for your patient to consult with your assistant to find out the diagnosis and treatment plan? It is much more than informed consent that we must provide, rather it is awareness that our patients expect. Good patient communications is essential to a modern successful practice. If you

want to comprehend what you say, how you say it, who heard you and what they heard, this program is for you.

COMPUTER IMAGING AND THE DENTIST AND HOW TO MARKET INTO THE FUTURE (Afternoon Session)

A picture is worth one thousand words, Confucious. Crown and Bridge can now be designed and executed by computer technology. The graphic process of these events are visible through computer imaging. We now have at our finger tips a vast source of diagnostic, treatment planning and operative display. But — what is it? How do I use it? Should I have one? Dr. Dzierzak will answer these questions and others. In addition she will describe how to market all the evolutionary materials and techniques that are coming on the scene.

Biography

Dr. Dzierzak is a specialist in fixed prosthodontics, Assistant Professor, Northwestern University and a researcher in restorative and esthetic dentistry.

PLACE:	Room 206B
TIME:	9:00 — 11:30 a.m. 2:15 — 4:30 p.m.
CHAIRMEN:	Dr. David Parr Dr. Peter Haslam

AIDS AND THE DENTISTS: WHAT TO LOOK FOR AND HOW TO LOOK OUT FOR YOURSELF

HILLAR VELLEND, M.D.

Synopsis

Dentists are on the front line for the diagnosis of AIDS. Oral pathology and head and neck manifestations are highlights of the illness. Oropharyngeal candidiasis is often the sentinel sign of symptomatic HIV infection. Severe intra-oral and peri-oral infection with the herpes simplex virus is common in patients with AIDS. Oral hairy leukoplakia is also associated with HIV infection. Persistent generalized lymphadenopathy syndrome includes

cervical lymph node enlargement. Kaposi's sarcoma is often found on the hard palate. Although the occupational risk of HIV infection among dental professionals and auxiliaries is low; nonetheless, infection control is paramount. Dr. Vellend will extensively describe the barrier techniques and attire necessary to protect oneself from HIV infection since one never knows who is a carrier.

Biography

Dr. Vellend is currently Associate Professor, Department of Medicine and Department Microbiology, as well as The Division of Studies in Medical Education, Faculty of Medicine, University of Toronto. He was Departmental Divisional Director, Infectious Diseases, Department of Medicine, University of Toronto from 1983-1988 and has written and lectured extensively on the subject of AIDS.

THE EMERGENCY OF LASERS IN DENTISTRY

TERRY D. MYERS, D.D.S.

Synopsis

Laser surgery has revolutionized treatment in medicine particularly in ophthalmology. With its ultra-precise, discriminating, clean and bloodless incisement it provides an ideal instrument for dental application. But can it successfully manage the dual problem of soft and hard tissue coincidence? Dr. Myers along with his ophthalmologist

brother developed the first laser designed specifically for both hard and soft tissue.

The lecture initiates with a discussion of basic laser principles proceeding to a review of medical laser systems. Dental laser research both invitro and invivo will be presented, concluding with a synopsis of future dental laser applications. There will be an actual demonstration of both hard and soft tissue applications of a laser following the lecture.

Patients are going to be asking about this!

Biography

Dr. Myers is presently Adjunct Professor of Forensic Sciences, University of Detroit, Department of Criminal Justice. He also delivers dental at the Detroit Zoological Park. Dr. Myers has instructed in Crown and Bridge and operates a private dental practice. He is currently doing individual research on lasers and biology.

COMMON SENSE ORTHODONTICS

RANDY LANG, D.D.S., D. Ortho

Synopsis

This presentation will concentrate on the types of orthodontic problems that can be easily and successfully corrected in General Practice.

The emphasis will be on how to achieve the maximum orthodontic result using simple appliances and a minimum of effort.

Some topics covered will be:

- The design and use of today's most popular removable appliances.
- Easy ways to adjust finger springs and clasps.
- Correcting minor crowding without extractions.
- Closing diastemas permanently.
- Uprighting tipped molars in preparation for fixed bridges using a simple bonding technique.
- An easy method to repair broken removable appliances.
- Splinting teeth together invisibly to make them stay put and prevent relapse.
- Picking and choosing the right case and the right appliance for successful treatment.

Biography

Dr. Lang was an honors graduate from the Faculty of Dentistry, University of Toronto, in 1966 and then the graduate program in Orthodontics in 1969. He is an elected member of the Council of the Royal College of Dental Surgeons and is also the Orthodontic Consultant to the Mississauga Hospital.

CRISIS IN THE DENTAL OFFICE

ROBERT S. UNGER Ph.D., C. Psych

CONCEPTUALIZING THE NATURE OF STRESS IN THE MODERN DENTAL PRACTICE

Synopsis

The SHARP reduction in the amount of traditional dental disease coupled with the increase in more complex procedures that entail more sophisticated techniques as well as increased patient expectations has led to more den-

tists, hygienists and assistants falling victim to "brown out", "burn out" and "lights out". The consequence of these pressures and stresses for professionals is any one for a combination of: anxiety, apprehension, fear or depression that triggers substance abuse with: amphetamines, anxiolytics (valium) and alcohol.

Dr. Unger, with his experience as a Clinical Psychologist with the Dentists-at-Risk program will attempt with his description of stress and stress reduction, to help all members of the office to recognize incipient difficulties and to inoculate themselves from their consequences.

Biography

Dr. Unger received his Ph.D. in psychology from Purdue University in 1975 and is a board certified Clinical Psychologist. Academically he is an assistant professor in both the departments of psychology and psychiatry at the University of Western Ontario. He has consulted for: Canadian Hearing Association, Ministry of Corrections, Ministry of Social Services, The Heart and Stroke Foundation, the Ontario Dental Association and others.

PLACE: Room 201B
TIME: 9:00 — 10:00 a.m.
2:15 — 3:15 p.m.

This presentation is sponsored by the Ontario Dental Associations' Dentists at Risk Program.

THE CLICKING JAW (A.M.) RADIOGRAPHY OF THE TMJ (P.M.)

CHARLES S. GREENE, D.D.S.

Synopsis

The pressures of urban living and the stresses of the workplace have increased our patients jaw parafunction, leading to temporomandibular disease. Jaw clicking is one of the obvious consequences that directs our attention. But what are its mechanisms? And, what is the current scientific knowledge about TMJ pathophysiology and morbidity? Additionally, the new more graphic and descriptive

imaging techniques such as magnetic resonance reveal the joint and its functions as never before. How can we use this technology to better treat Temporomandibular Disorders?

Biography

Dr. Greene has been highly prominent in this field for over a decade. He is respected for his conservative, although thorough, approach. As a general practitioner in private practice in Skokie, Illinois, coupled with his professorship and co-directorship of the Temporomandibular Jaw Clinic, Department of Orthodontics, Northwestern University, he conveys a credibility that we can respect.

PLACE:	Room 203D

TAX REFORM AND THE DENTIST

MARTIN CHASSON, C.A.

Synopsis

What new government tax innovations are now manifestly affecting our profits?

The massive debt levels steadily being increased in all branches of government must be paid. With its new federal sales tax we have an overt means of debt restraint. However, there are many other covert forms of tax that we as dentists either do not know of or more likely do not understand. If we are

to eke out from our considerable efforts what is our privilege, then very precise handling of our finances is imperative.

First, Mr. Chasson will be describing in depth the current changes in taxes and how they affect the dentist, management companies, the capital gains exemptions and existing tax shelters. Then more definitive attention will be given to the current status of tax shelters.

Literally, you can't afford to miss this!

Biography

Mr. Chasson is Senior Partner, Chasson and Greenglass Chartered Accountants, specialists in tax accounting.

ANTIMICROBIAL TREATMENT OF PERIODONTITIS: IT'S INFECTIOUS

RICHARD P. ELLEN, D.D.S.

Synopsis

The majority of persons with an infectious illness do not have it cut or scraped — they receive an antibiotic. Because most periodontal diseases are infectious in nature, antimicrobial attack is a logical strategy. Dr. Ellen will briefly review current concepts of antimicrobial therapy emphasizing the discriminating selection of patients who are most susceptible to this form of treatment. Emphasis

will be placed on measurable parameters which can be monitored in order to determine successful outcome.

Biography

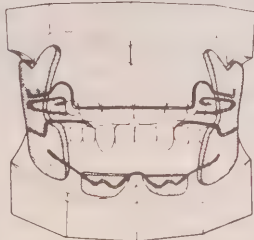

Dr. Ellen is Professor of Dentistry and Microbiology, Head, Department of Periodontics, University of Toronto.

PLACE: Room 203D

TIME: 10:15 — 11:15 a.m./3:30 — 4:30 p.m.

ENDODONTIC EMERGENCY PAIN DIAGNOSIS (Morning Session)

JOSEPH J. WILLIAMS, D.D.S.

Synopsis

PAIN has always been THE compelling factor in dentistry. The principal treatment has long since shifted from extraction to extirpation. Nevertheless the ability to **rapidly** and accurately diagnose and treat pain is crucial to our patients' welfare and our own sense of satisfaction. This is the cutting edge. In this session Dr. Williams will outline his methodology for dealing with endodontic pathology.

CRACKED TOOTH SYNDROME (Afternoon Session)

Synopsis

Many dental interceptions and extensive restorations have failed from an inability to recognize the cracked tooth. Often months of indecision, frustration and embarrassment relate to the chronic development of either a fracturing tooth or a cracked but crowned tooth. How can we recognize the nuance and thus reduce our stresses and sustain our patients' confidence in our ability? Acute trauma creates horizontal fractures in anterior teeth, either coronal or radicular. Chronic trauma often induces vertical fractures that develop insidiously and test our powers of diagnosis. Dr. Williams will present the results of his ongoing clinical study of vertical fractures and most important of all the means to rapidly treat them.

Biography

Dr. Williams is presently Assistant Professor, Boston University, Goldman School of Graduate Dentistry and on the Special Scientific staff of the University Hospital, Boston University Medical Centre. He is in private endodontic practice in Brookline MA in partnership with Dr. Herb Schilder.

PLACE:	Room 203B

PROSTHODONTIC AND SURGICAL CONSIDERATIONS WITH RESPECT TO OSSEOINTEGRATED IMPLANTS

Gerald Baker, D.D.S.

Itzhak Barzilay, D.D.S.

Synopsis

Many practitioners of dentistry are going to be caught out on the limb as they rush unprepared into the field of implants. Critical patient selection is essential. This can only be obtained by careful assessment, diagnosis and execution. Dr. Baker will identify the various factors regarding surgical evaluation supported by surgical principles in order to guarantee surgical success.

Dr. Barzilay will identify the various factors regarding surgical evaluation supported by surgical principles in order to guarantee surgical success.

Dr. Barzilay will use the same parameters to describe the subsequent placement of the prosthesis employing new trouble-shooting techniques and using newly available components and attachments.

Biographies

Dr. Baker is Head of the Division of Oral and Maxillofacial Surgery at Mt. Sinai Hospital, Toronto. He is an Assistant Professor at the Faculty of Dentistry, University of Toronto.

Dr. Barzilay is in private practice limited to prosthodontics in Toronto. He is an Associate in Dentistry, University of Toronto and Research Assistant, Eastman Dental Centre, Rochester, New York.

PROGRESS IN CANCER TREATMENT: WHY IS IT SLOW AND WHERE DO WE GO FROM HERE?

ROBERT S. KERBEL, M.D.

Synopsis

Within the past 40 years enormous resources have been funnelled into cancer research. In spite of this a cure for most forms has been disappointingly slow. Nonetheless, our knowledge of cancer's development and metastasis as well as their resistance to therapeutic agents has been enhanced. As a consequence this new information suggests the need

for a re-appraisal of conventional treatment and the exercising of new strategies. An interesting example of this — inhibiting blood vessel formation in tumours — will be described. A model for this enterprise is malignant melanoma — a potentially fatal type of skin cancer **thought** to be caused by exposure to sunlight.

Biography

Dr. Kerbel is currently Head of the Division of Cancer Biology at the Mt. Sinai Hospital Research Institute, Toronto and Professor of Medical Genetics, University of Toronto. He also holds a cross-appointment as Adjunct Professor in the M.D. Anderson Hospital and Tumor Institute, Houston, Texas. His research deals with how cancers become more aggressive and spread from one site to another in the body. Many of his studies deal with malignant melanoma. Dr. Kerbel is a member of a number of scientific journal editorial boards and scientific reviews panels. He has lectured extensively throughout Canada, the U.S., Europe, Israel and Japan.

THE USE OF ANESTHETICS IN THE PRACTICE OF DENTAL HYGIENE (Morning) ADVANCED PERIODONTAL THERAPY — WHY IS IT NECESSARY? (Afternoon) SALME LAVIGNE, R.D.H.

Synopsis

With the legalization of the application of Topical Anesthetic agents by Dental Hygienists, their appropriate usage has become a subject of much controversy. This presentation will focus on the assessment of the need for pain control during dental hygiene procedures, the selection of appropriate anesthetic agents, their mode of action and contraindications.

Techniques for the placement of

topical anesthetic agents for both sulcular delivery and pre-injection will be discussed including a review of Head and Neck Anatomy.

The AFTERNOON SESSION will introduce the concept of advanced periodontal therapy, what it is, why it is necessary and how it can be implemented in a practice setting. Some of the topics covered will include interpretation of research; microbiological concepts, immunological approaches; antibiotics and antimicrobials. A model for the implementation of these concepts will be presented with some discussion of treatment planning.

Biography

Mrs. Lavigne received her Dental Hygiene education from the University of Toronto and Expanded Function training in Periodontal Therapy and Anesthesia at the University of Northern Arizona. For the past seventeen years, she has held the position of Co-ordinator of Dental Programs at Confederation College in Thunder Bay.

HONOURARY LIFE MEMBERSHIP

CHARLES H.M. WILLIAMS,

D.D.S., B.Sc.D., F.A.A.P., F.R.C.D.(C), D.Sc. (McGILL)

The Academy of Dentistry, Toronto, at its Annual Winter Clinic Meeting, 1989, is proud to present its Honourary Life Membership award to Dr. Charles H.M. Williams.

Based on his manifold contribution to the dental profession, Dr. Williams literally needs no introduction. Nevertheless, his efforts and accomplishments are of such magnitude and quality that some delineation is called for.

Charles Williams spent his earlier years in London, Ontario. After graduation from high school he enrolled in the Faculty of Dentistry, University of Toronto and graduated in 1927.

From that point began an academic and organizational history of a vast dimension. It initiated with a B.Sc. in 1928. In 1929 he began his career as a staff member, Department of Periodontics, Faculty of Dentistry, University of Toronto, culminating this in 1956 by becoming full Professor and Head of the Department.

Meanwhile he was actively pursuing the neophytic science of periodontics. Neophytic indeed because it was not recognized as a specialty until 1940! Nonetheless Charlie had long before established himself as a specialist dealing exclusively with periodontics. In all these endeavours it must be appreciated that he was a pioneer. What is taken for granted today required tremendous initiative, perception, prescience and determination. And as the recognition rolled in,

HONOURARY LIFE MEMBERSHIP

CHARLES H.M. WILLIAMS,

D.D.S., B.Sc.D., F.A.A.P., F.R.C.D.(C), D.Sc. (McGILL)

(Continued From Previous Page)

the honours soon followed. In 1960 he became an Honourary Fellow of the American College of Dentists. In 1961 a Diplomat of the American Academy of Periodontology. He was presented with the Elmer Best Memorial Award by the Pierre Fouchard Academy in 1965. Then he became President of the Royal College of Dentists of Canada in 1967, followed in 1968 by his election as the President of the American Academy of Periodontology. These were certainly prolific times for in 1971 Charlie was made Professor Emeritus, University of Toronto and Consultant to the World Health Organization. In 1977 he was made an honourary Member of the Canadian Academy of Periodontics and in the same year was given a Citation for distinguished Services by the University of Toronto. The wonder is that Charlie was now over seventy and yet in 1980 he was presented with the honorary degree of Doctor of Dental Science by McGill University. Finally just last April his peers again recognized his achievements with the commissioning of a portrait jointly by the Canadian Society and Ontario Society of Periodontics that now hangs in recognition in the Dental Building, University of Toronto.

But Charlie is much more than just a professional. He has three fine children, and is presently happily married to Dorothy. In the winter for most of his life and up to the present, Charlie has avidly skied and some years ago he actively canoed and fished. Presently his consuming interest is horticulture.

Well that is a sketch of the man. There is much that has gone unmentioned in history; nevertheless, Charlie is undoubtedly one of the giants of our profession. As such, we the officers of the Academy are eminently proud to present its Honourary Life Membership award to Charles H.M. Williams.

FIRST STATED MEETING

**WEDNESDAY, JANUARY 17, 1990
INN ON THE PARK**

NEW ASPECTS OF DENTISTRY, 1990

Presented by

**GORDON J. CHRISTENSEN, DDS, MSD, PhD
Provo, Utah**

Dr. Christensen, Founder and Co-Director of Clinical Research Associates currently participates on the post-graduate faculties of many dental schools and is an Adjunct Professor at Brigham Young University and a Clinical Professor at the University of Utah. He has lectured throughout the world for many years and has published widely.

Dr. Christensen's presentation is designed to update practitioners in some of the new and challenging areas of dentistry. Included in the presentation will be:

1. New concepts in fixed prosthodontics.
2. Tooth preparation.
3. Simple building-up of teeth.
4. Near fool-proof tissue management.
5. The best impression materials.
6. Crowns — the many types.
7. Bonding crowns to teeth.
8. Bleaching vital teeth.
9. An update on implants.
10. Other new products and concepts recently evaluated by Clinical Research Associates.

Use the enclosed REGISTRATION FORM to reserve now or look for the EARLY BIRD REGISTRATION DESK at the Winter Clinic. Reduced fees are being offered for those who register on or before Winter Clinic.

EMERGENCY SERVICE

Support the Academy's Emergency Service by placing its telephone number on your answering machine when you are out of the office.

HOURS:

Monday — Friday

4:30 p.m. — 1:00 a.m.

Saturday, Sunday and Holidays

9:00 a.m. — 1:00 a.m.

TELEPHONE: 924-8041

During daytime hours, the Academy office (967-5649) will refer patients to dentists who accept new and/or emergency patients.

***If you are interested in
becoming a member of this service,
contact the Academy office.***

PAST PRESIDENTS OF THE ACADEMY

The Past Presidents of the Toronto Dental Society are identified as Past Presidents of this Academy. Below is a list of Past Presidents from 1891 to 1989.

1891-92 N. Pearson*	1939-40 Wm. G. Trelford*
1892-93 J.B. Willmott*	1940-41 Edmund T. Guest
1893-94 N. Pearson*	1941-42 Steward A. MacGregor
1894-95 W.H. Wunder*	1942-43 Lloyd M. Grose*
1895-96 G.S. Martin*	1943-44 Charles McLean*
1896-97 H.E. Eaton*	1944-45 Harold Skilling*
1897-98 J.J. McDonagh*	1945-46 Harold Swales*
1898-99 J.E. Wilkinson*	1946-47 H. Colton Bliss*
1899-1900 J.B. Willmott*	1947-48 F. Harold Shepherd*
1900-01 A.E. Webster*	1948-49 Joseph H. Johnson*
1901-02 F.D. Price*	1949-50 Edgar A. White
1902-03 W.E. Willmott*	1950-51 Earl Bancroft*
1903-04 G.S. Martin*	1951-52 Mark G. Boyes
1904-05 C.E. Pearson*	1952-53 J. Gordon Chalmers*
1905-06 W.G.L. Spaulding*	1953-54 Elmer J. Henderson*
1906-07 J.B. Willmott*	1954-55 W. James Smith*
1907-08 R.G. McLaughlin*	1955-56 J. Bevan King*
1908-09 A.J. McDonagh*	1956-57 Harvey Milburn
1909-10 H.E. Eaton*	1957-58 Robert W. Marshall
1910-11 A.E. Webster*	1958-59 William A. Weir
1911-12 A.D.A. Mason*	1959-60 James A. Bigelow
1912-13 C.A. Kennedy*	1960-61 Vernon A. Herron*
1913-14 W.E. Willmott*	1961-62 Arthur E. Histrop*
1914-15 G.W. Grieve*	1962-63 John H. Mullett
1915-16 F.C. Husband*	1963-64 Robert M. Grainger
1916-17 E.F. Arnold*	1964-65 J.E. Carson McGowan
1917-18 W.B.T. Amy*	1965-66 Murray Cornish
1918-19 J.E. Rhind*	1966-67 Morley G. Hardy
1919-20 R.D. Thornton*	1967-68 Gordon M. Marshall
1920-21 W.H. Coon*	1968-69 Bert J. Levin
1921-22 H.A. McKim*	1969-70 George C. Stirling
1922-23 R. Gordon McLean*	1970-71 Wilfred J. McColeman
1923-24 J.A. Bothwell*	1971-72 Miet A. Kamienski
1924-25 Arthur Day*	1972-73 Don M. McKee
1925-26 W.G.L. Spaulding*	1973-74 Bernard N. Crystal
1926-27 H.G. Robb*	1974-75 William S. MacKenzie
1927-28 R.S. Woollett*	1975-76 Robert S. McKegney
1928-29 W.B.T. Amy*	1976-77 Ronald S. Anco
1929-30 T.E.C. Butler*	1977-78 Murray Wagman
1930-31 E.C. Veitch*	1978-79 Gordon Perlmutter
1931-32 J. W. McDonald*	1979-80 Robert H. Pick
1932-33 Thomas R. Marshall*	1980-81 Len Shapira
1933-34 Edmund A. Grant*	1981-82 Ronald F. Martin
1934-35 Frank Martin*	1982-83 Ronald Traub
1935-36 William J. Kerr*	1983-84 Arthur J. Breglia
1936-37 Stanley S. Crouch*	1984-85 James T. Hing*
1937-38 Harvey W. Reid*	1985-86 Alexander J. Puskas
1938-39 Harold Hoag*	1986-87 Stewart Sigismund
	1987-88 Donald Stewart
	1988-89 Barry Chapnick

Charles H.M. Williams, D.D.S., B.Sc.D., F.A.A.P., F.R.C.D.(C), D.Sc. (McGill)	1989

REPORT FROM THE MEDIATIONS COMMITTEE

As professionals we must recognize and assume our responsibilities.

The Code of Ethics of The Canadian Dental Association is a “set of principles of moral behaviour, defining responsible conduct in specific professional situations”.

We must treat our patients as our fellow man, just as we would like to be treated ‘if the shoe were on the other foot’. Every time we undertake a procedure we should ask ourselves about our competence in the performance of this treatment. If the treatment is too complex and beyond our training and ability the patient should be referred to a specialist who is more able to treat the problem in the patient’s best interest. In the same light, the many new materials and techniques that are bombarding us every day should be closely evaluated on an individual basis. Patients should not be given unrealistic expectations as this almost always results in an unhappy patient.

There has been some re-organization of the Academy’s role in the Mediation process. The Academy has become the ‘Co-ordinator’ of the four local society Mediation Committees. This change became necessary in order that all members of a mediation committee have liability protection in the event that legal action be taken against them by a patient or a dentist.

All members of the Academy should be thankful to the volunteer members of the profession who have been appointed by their society to help resolve unhappy patients reach mutual agreements with their dentists.

A special word of thanks to Raisyl Wagman and Nancy Self who are usually the first within the Academy to hear of a problem and steer the situation in the right direction.

Gilbert Chapnick D.D.S.
Mediations Co-ordinator

DIALOGUE IN DENTISTRY PROGRAM

By now, we trust that you are aware of the D.I.D. program sponsored by the Academy of Dentistry Toronto in conjunction with the four ODA component societies of Metropolitan Toronto. Since June, 1989 when the chairman of the D.I.D. Committee, Dr. Aldo Boccia, mailed a notice to all Toronto dentists informing you of this new service, we have been actively contacting Toronto employers and offering free professional advice for the creation of high quality, cost containing employee dental benefit plans.

One of the key features of the program requires that you, the dentist in private practice, be aware of **your** patient's degree of satisfaction with his/her dental benefits plan. If there is expressed concern with the inadequacy of their plan, then this presents an opportunity for D.I.D. to help. Simply inform your patient that the Academy of Dentistry Toronto provides a free professional service to help employers address this issue, and with you patient's co-operation and permission, obtain the name and phone number of his/her employer and specific individual responsible for dental benefits.

Forward the information to the Academy office at 967-5649 and we will contact the employer on your behalf. There is virtually no risk to you, and indeed, you have much to gain by providing "contact referrals" to D.I.D. (i.e. you are increasing the goodwill of your practice by showing patients that you realistically care about their dental welfare). Furthermore, by working together with the Academy you will be helping your profession communicate more effectively with dental plan providers, encourage the creation of more appropriately designed dental benefits plans and promote the betterment of dentistry in Toronto.

Please participate! We are counting on your support to make Dialogue in Dentistry a great success!

Rollin Matsui, D.D.S.

Contact Dentist, Dialogue in Dentistry

Academy of Dentistry Toronto

WHAT WILL HAPPEN TO YOUR OFFICE IF YOU ARE SICK OR DISABLED?

ACADEMY OF DENTISTRY MUTUAL AID PLAN

This is a group of dentists who will help a member of the group at a time of distress. Ideally the group will number about twenty, but the number fluctuates as people join and leave. If you are a member of this group, and are unfortunate enough to be unable to practise because of illness or accident, the members of the group will take turns in operating your practice, with your auxiliaries, to a maximum of four days per week, for a number of weeks. This will provide service for your patients in case of emergencies, completion of treatment in progress and maintain the flow of recall patients.

Some of the benefits are, maintaining service availability to your clientele and employment for your auxiliaries as well as preventing the formation of a huge backlog of patients waiting for your return. If it becomes necessary for a practice to be sold, the plan can maintain the viability of the practice until the sale can be completed. The other members of the plan will come to your office one day at a time, on a rotating schedule. If the group numbers 20, the remaining 19 dentists would be responsible for about one day each, every five weeks for each disabled dentist. Fees are charged in the usual way at the stricken dentist's office, and the contributing dentist does not receive compensation.

The plan has been available for several years and has worked well to date for the stricken dentist. You might want to ask a friend or two to consider joining, or perhaps start a whole new group. A set of by-laws has been adopted, but they can be changed if the need arises.

Further details and a copy of the by-laws are available at the Academy office – 967-5649 or by calling Berril Garshowitz, 229 Yonge Street, Ste. 213A, Toronto, M5B 1N9, telephone 368-3375.

ASSOCIATE PLACEMENT SERVICE

The Associate Placement Service continues to be an important part of the Academy's function in the Metropolitan Toronto area.

At the present time there are more dentists seeking placements than there are vacancies. We urge all those who require associates to call the Academy office with their requirements.

To facilitate the Placement Service, we would ask that you inform the Academy office once your requirements have been met.

SR-ISOSIT

What do you get when you combine the old and the young? Years of trusted Knowledge with an Enthusiastic drive for Quality and Service.

Susan, Robi, Ron

BOOTH NO. 327

NOTES

NOTES

We go to great lengths to give you service.

Service is much more than a word to us — it's a commitment, an attitude that drives our organization and guides our every action.

We know that when you need one of our products, you need it fast. When we receive your call we immediately fill your order and send it out without delay. We know you can't afford to waste time.

We excel at service. We have the inventories and the people

on the job right across the country — in most cases only a telephone call away.

Our people draw upon the most sophisticated resources in the industry, to provide you with everything you need to make your business flourish.

Call us. We're there when you need us.
